

Annual agreement does not validate hourly demand

2020 China baseline audit | 31 provinces; reconstructed source-model demand

National annual discrepancy: +0.88% against the provincial sum. Nine provinces differ by more than 5%.

2020; four available months, shown separately

c Residual temporal mismatch

Month	Monthly discrepancy (%)
Jul	+9.15%
Sep	-6.35%
Oct	-7.34%
Nov	-9.36%

Source model minus official annual demand (%)
Annual anchoring fits each province to its official annual total; it preserves the original hourly shape.
